Earle, Jeff,

I have attached the NMED report. However, it is my understanding that EPA has comments/concerns with report. We cannot attach it until it is final. I will check with Lisa and LaDonna on the status.

Or, maybe we just reference the NMED report in the Phase I report and let it be a stand-alone document.

Thinking about it.

Mark

Thanks Earle.

NMED prepared a report on the private well sampling. Will send now. It is impressive. They did a lot of work. I had no idea that they were doing such a report

Thanks Earle.

If Jeff has a hard copy, can he make me one?

Will discuss on call today.

Brod & Stone, 1981 is a double sided, like 30X40-inch hydrogeologic report-map sheet No. 2 with lots of figures & a table or two. I sent Jeff a print shop copy a few weeks ago. I can get you a copy made tomorrow & send it out express so it gets there early next week. I can scan or take cell phone pictures of the alluvial sections of the map & send them to you later today or tomorrow. I won't be able to send you any of this in time for today's call since I am at the community college away from my desk at home.

I looked on the NMBMR website and I couldn't find a listing for this map.

Earle,

Could you send me an electronic copy of the 1981 Brod and Stone paper?

I do not have it.
